THE DATABASE DESIGNED FOR THE FOOD COMMUNITY

We know that searching online for reputable and relevant research can be a frustrating and time-consuming exercise.

It's no surprise then that many in the global food community are fed up with scrolling endlessly through unsuitable results—however, there is a solution: **FSTA!**

Discover powerful search functionality designed specifically for food and beverage research

WHY FSTA?

FSTA can be trusted by those studying and working in the sciences of food and health because it's been developed expressly for them.

Containing only information which is relevant to food, beverages and nutrition, FSTA is carefully structured making it highly effective for information searching in the sciences of food and health. This enables researchers, scientists and students to retrieve high quality, interdisciplinary results with a minimal chance of false hits.

WHAT INFORMATION CAN YOU SEARCH?

Confidently research content carefully curated by experts in the sciences of food and health.

- Discover research from 60 countries, in 29 languages
- Search 1,400,000 high-quality abstracts directly related to food and beverages
- Draw from over 22,675 sources, including nearly 5,500 scientific journals
- Reference abstracts that span 50 years of research
- Keep up-to-date with cutting edge research, with weekly updates

RESULTS YOU CAN TRUST

The **FSTA** database is closely managed by a team of expert scientists, who rigorously assess every title indexed, filtering out predatory and substandard journals.

You can be confident everything you find on **FSTA** is relevant to your field and meets high standards of scientific validity and rigour.

Make targeted search queries referenced against the world's most comprehensive food thesaurus
