

Ovid® Open Access

In today's knowledge-centric, digital age, the Open Access publishing model enables the flow of peer-reviewed information for global consumption. Open Access content offers researchers and clinicians many benefits:

Streamline Your Library's OA Content

- Access to online, unrestricted research information produced by professionals from around the world
- Enables authors to publish scholarly research findings and share through a public forum
- Accelerates the research cycle, offering immediate access to additional and relevant findings
- Eliminates restrictions on disseminating these articles for education purposes

With **Ovid® Open Access**, users will get thousands of additional resources—at no extra charge—to information that will help them transform their research, practice, and education.

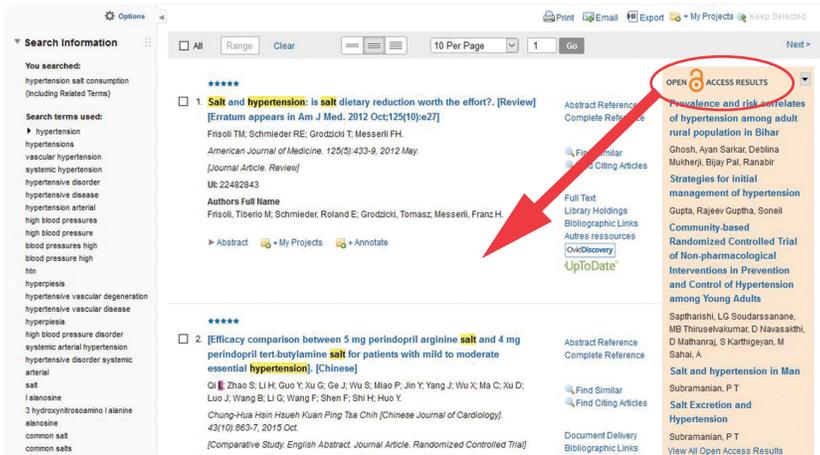

- Integrated search of Open Access content with users' subscribed resources in one convenient solution, at no extra charge
- High-quality, peer-reviewed content from Medknow Publications and PubMed Central®
- Access to local content from around the globe
- Content affiliated with over 300 international medical societies and associations
- Expands coverage in over 20 subject area categories
- Quick access to full text and abstracts in biomedical and life sciences

The screenshot displays the Ovid Open Access search interface. At the top, there are navigation links for 'My Account', 'My PayPerView', 'Ask a Librarian', 'Support & Training', and 'OvidDiscovery'. Below this is a search bar and a navigation menu with options like 'Search', 'Journals', 'Books', 'My Workspace', 'EBP Tools', 'Multimedia', 'OvidMD (Product on Trial)', and 'Mobile'. The main search area shows 'Basic Search' with a search history of 1 item. The search results are displayed in a list format, with the first result being 'Salt and hypertension: is salt dietary reduction worth the effort? [Review]'. The result includes the journal title 'American Journal of Medicine', volume and issue information, authors, and a link to the full text. A sidebar on the right highlights 'OPEN ACCESS RESULTS' with a list of related articles, including 'Prevalence and risk correlates of hypertension among adult rural population in Bihar' and 'Strategies for initial management of hypertension'.

Ovid® Open Access Results—Search both subscribed content and Open Access content with a single search.

Ovid® Open Access

Viewing Ovid Open Access Results:

- Expand the quick results pane to access all relevant Open Access search results.
- At no additional charge, view abstracts and full-text content.
- Take advantage of great Ovid workflow tools like Export, Print, and My Projects.

Ovid Transforming Research into Results

Ovid is your complete online research solution, offering a single, online destination where you can search, discover, and manage the critical information you need to streamline your research productivity and your work.

- Work the way you want to work with a variety of search modes and customizable work productivity and content alerting tools.
- Save and manage critical research findings and documents in a dedicated work area—My Projects.
- Extend your Ovid research experience beyond Ovid with the Ovid Toolbar.
- Search all Ovid resources books, journals, and databases—simultaneously with just one query.
