

GIDEON eBook Collection

Since 1992, GIDEON (Global Infectious Diseases and Epidemiology Online Network) has been helping the medical, public health, and public policy communities better understand, diagnose, monitor, and forecast infectious diseases affecting populations all over the world.

The GIDEON eBook collection is great for physicians in clinical settings, researchers tracking and understanding an outbreak, or students and faculty in a classroom. It provides comprehensive coverage of individual diseases (or disease groups), pathogens, drugs, and vaccines in every country in the world. And with the Ovid platform, users can navigate to exactly what they're looking for quickly, improving the way they work.

Available on Ovid, nearly 200 eBooks in Infectious Disease for physicians, policymakers, and educators

- Instantly fill gaps in your electronic content collection in infectious disease
- Rely on one of the biggest names in Infectious Disease research
- Offer easy access to current and accurate content on infectious diseases, drugs, vaccines, and pathogens in every country of the world
- Support the professionals, faculty, and students in epidemiology, public health, and clinical medicine
- Complement the GIDEON infectious disease database, also available on the Ovid platform

Key Features:

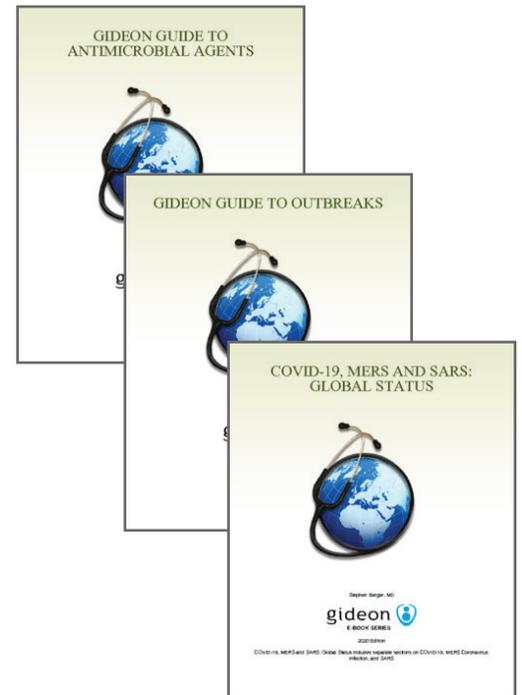

- Includes 188 disease-specific books that make up the entire GIDEON disease collection, PLUS 9 titles on bioterrorism, outbreaks, vaccines, bacteria, and more
- Features a just-published title on COVID-19, MERS, and SARS, now on the *Doody's Review Service™* COVID-19 book list
- All books can be searched simultaneously using just a single search query
- Precise, natural-language searching for quick information discovery
- Time-saving workflow tools such as inline abstracts, search results sorting and annotations, and more
- Chapters can be downloaded and saved as PDFs
- Ovid's Book Reader enables pinpoint searching of any area of a book

GIDEON eBook Collection

GIDEON Disease Collection

Explore the up-to-date status of infectious diseases in every country of the world!

- Diseases include anthrax, meningitis, cholera, hookworm, spotted fevers, various tropical skin ulcers, and more
- Also includes *Gideon Guide to COVID-19, MERS and SARS: Global Status*
- All books include distribution maps and images to help visualize outbreaks
- Chapters are organized alphabetically and cover epidemiology, clinical features and presentation, use in bioterrorism, and other key topics
- Data is derived and organized from multiple sources, including various Health Ministries, the WHO, CDC, and relevant peer-reviewed publications—and regularly reviewed, assessed, and re-assessed

Additional Specialty Books

- *Infectious Diseases and Bioterrorism*
- *Infectious Diseases of the World*
